restoration

Established in 1986, Arc Construction has quietly built a strong reputation as a professional building contractor in the greater Leinster region.

Arc Construction offers fully comprehensive range of building services in the domestic and commercial sector. We consistently deliver the highest service and quality standard aimed at satisfying our customer needs.

We specialise in the conservation and restoration of listed properties, covering both domestic and commercial projects. Building materials are used which closely match the character and tradition of the original building. We also try, where possible, to recycle and reuse reclaimed materials.

We have undertaken many new builds and conversions, using both contemporary and traditional styles. This has been an exciting area to develop and has allowed us to offer our clients more choice, whilst still maintaining our standards; both in build quality and services.
